Evaptainers EV-8 introduces a revolutionary product to the world of refrigeration. The EV-8 is a lightweight, easy-to-carry, fully portable refrigeration unit that can keep perishables like fruits, vegetables and dairy products fresh in the hot summer months. EV-8 requires no electricity to operate and is 100% eco-friendly with absolutely no greenhouse gas emissions.

Evaptainers makes use of our patented ZeerTec technology. The technology becomes activated with a user fills the internal reservoir with any clean source of water (e.g. tap, well, river, lake). The walls of the device then begin to draw out heat from the interior of the device, cooling the internal storage space by 15-20 degrees Celsius from ambient conditions.
